I find that I have been putting in too many headaches and hours onto a manuscript that was due today, but the publisher will allow me another week on it..... yeah! SO.....(:+}}.....dit dit.....dit.....

QST QST DE NA4G BT

Tonite be the night to fire up yer glow-in-the-dark firebottles an' warms yer heart, an' smiles yer smiles fer somemores o' dat fine ether burning play, on those ol' useless short waves o' 200 metres an' down. This time methinks me will play on two of those short waves. First QRG will be 84.86563 metres QTR 0300Z and 0400Z with an alternate QRG of 83.80953 metres. Note ye that the alternate be of the same timbre and resonance as a fine Stradivari quartze plucked straight from the innards of one of them thar greate belchin' visual

Behemoths wat receives picures on the ether. This be fer testing out wats them that has no fine quartzes may cheaply use bye the byes if an aforesaid Behemoth be opened by the gullet fer gathering in some fine parts to use upon these waves. Second QRG will be 166.4355 metres QTR 0500Z. This should allow some of them shorter wave folks to join in on the fun. Anything be allowed that emits that fine and fair wave of the continuous category, as long as it be not afeared to emit warm glows in the wee small hours. Things which emitteth not such glows be used only in the direst of straights, when no recourse haves ye to another of warmer glow.

Calls ye the crewe bye the sign, to wit:

CQ BA/GB CQ BA/GB DE yourcall yourcall K

upon the top of the apointed hours. Reports ye the findings and who be about bye the byes upon the net in the next weeke.

So, mateys, stokes ye up yer firebottles, an' grapples yer tin cans atop yer 'ead, an keeps yer keys at the fore, cuz a fine nite aboard the watch it may be this cold winter's nite. Fair winds an' followin' seas they be fer the crewe wats plyes the ether aboard this nite.....

73/ZUT DE NA4G/Bob
